

Sisk Rifles Manufacturing LLC

914 S Boundary Way
Tell City, IN 47586

About:

To quickly and efficiently close with and destroy our enemies, our gear needs to be able to adapt to any environment. Our products increase operator lethality in complex environments by giving users a level of maneuverability yet to be discovered by the rest of the weapons industry. The current prototypes are fitted for use with the M4 Carbine, however our products can be attached to NGSW's such as the MCX Spear or M27 IAR. Our technology, across all weapon platforms, will set the new standard for maneuverability, lethality, and safety.

PRODUCTS

HEPR

siskriflesmfg.com/hepr-product-video

The HEPR (Handguard Extending Picatinny Rail) Patent# 9,574,840, offers 360-degree rotating picatinny rail/rails which can accept any attachment that could be mounted to standard rails. The HEPR is the only system that allows users to utilize 100% cover with zero backslash.

MABS

siskriflesmfg.com/mabs-product-video

The MABS (Multi Axis Buttstock) Patent# 8,720,099, significantly increases the Warfighter's capabilities in a CBRN environment. Target acquisition and sight alignment will not be given up while using a gas mask. The MABS is the only system which allows users to shoot from either shoulder AND either eye.
